Order O-FY18-006

LOAN ORDER – WATER METER REPLACEMENT PROJECT

ORDERED, that \$3,625,000 is appropriated to pay costs of replacing water meters throughout the Town, and for the payment of all costs incidental and related thereto (the “Project”), and that to meet this appropriation, the Treasurer, with the approval of the Town Manager, is authorized to borrow said amount under and pursuant to Chapter 44, Section 8(6) of the General Laws, or pursuant to any other enabling authority, and to issue bonds or notes of the Town therefor; and that the Town Manager is authorized to contract for and expend any grants, aid or gifts available to pay costs of the Project and to take any other action necessary or convenient to carry out the Project.

Explanation:

This is the second phase of the project that began in the summer of 2016. It is referred to as “advanced metering infrastructure”. It is a cellular based system that uses software to interface with the water departments billing system. It allows continuous flow measurements and stores data for fifteen years. It is not necessary to visit or drive by a property to get meter readings. Data on any meter can be viewed and monitored by the water department and the customer if requested. There are an estimated 7,300 meters to be replaced and tied into the new system. It is expected that work will be completed within 18 months.

SEWER ENTERPRISE TRANSFER – EMERGENCY REPAIR

ORDERED, pursuant to Section 6-4 of the of the Bridgewater Home Rule Charter, that the Town Council assembled vote to appropriate and transfer \$150,000 from Sewer Reserved for Special Purpose – Capital Account to Sewer Sludge Line Replacement Account.

Source of Funds	Account No.	GL Account Description	Amount
SWR RESERVE SPEC PURPOSE	6100-358000	SWR SPCL PURP- Capital	\$ (150,000.00)
Total:			\$ (150,000.00)
Use of Funds	Account No.	GL Account Description	Amount
SWR EXPENSE	6110-583003	SWR Sludge Line Replacement	\$ 150,000.00
Total			\$ 150,000.00

Explanation from Sewer Superintendent:

The original raw sludge line was installed in 1988 when the new wastewater treatment plant was built. It is made of ductile iron. The line incurred a blockage this year and when trying to clear the blockage, pieces of the line were being removed. This indicates that line has deteriorated and has reached its useful life span. The obstruction could not be cleared. With the upgrade of the treatment facility that is needed due to the new National Pollutant Discharge Monitoring System permit (NPDES) and after discussing this situation with the engineers, the decision was made to install a completely new line which will be permanent. The new line will be made of PVC and needs to be installed prior to the wintry weather setting in.
